Go, React.js, DALL·E 3, GCP (App Engine, GCS, GCE), Elasticsearch

-
- Built a Go backend with **JWT authentication** and deployed on **Google Cloud App Engine**.
- **DALL·E 3** for prompt-based image generation.
- Implemented **Elasticsearch** for keyword and user-based post search.
- Managed image/video uploads with **Google Cloud Storage** buckets.

j rke l qoe l l

Kotlin, Ktor, Jetpack Compose, Hilt Dependency Injection, Google Exoplayer, Room

- Created a full-featured music app using Android Studio, Jetpack libraries and MVVM architecture.
- Supported song playback, album browsing, and favorites collection.
